

# GGPLOT2

## book--dataset

- Remove NA values
- Visualize frequency distribution of checkouts in the book dataset
- Visualize boxplot plot high usage books by call number class[Hint: derive new variable high usage books which have more than 10 checkouts] and color by subCollection- any three category
- Visualize stacked bar and group chart high usage books by call number class[Hint: derive new variable high usage books which have more than 10 checkouts] and color by subCollection- any four category
- Create a bar plot that depicts the number of items in each sub-collection, faceted by format. Arrange sub plots horizontally.
- Apply various themes in the above plots.
